

## OSI Systems Facilitates Significant Drug Seizure in Albania

March 9, 2018

HAWTHORNE, Calif.--(BUSINESS WIRE)--Mar. 8, 2018-- OSI Systems, Inc. (the "Company" or "OSI Systems") (NASDAQ: OSIS) today announced that Albanian Customs and State Police, facilitated by the OSI Systems' turnkey scanning program, seized 1,350 pounds of cocaine being smuggled into Albania. The narcotics were hidden in a false floor of a produce shipment, and were detected by Rapiscan Eagle® scanning systems operated by the Company's S2 Albania subsidiary. Albanian State Police estimate the value of the seizure to be \$220 million.

The Company's turnkey scanning program has been deployed in multiple countries and in each case has a proven track record of benefits, including:

- Significantly reducing the trafficking of contraband, including narcotics, weapons and currency
- Increasing accuracy in declaration of imported and exported goods, leading to accurate payment of duties and significant fiscal benefit to sponsoring governments
- Improving transparency and speed at customs checkpoints, benefiting international cargo shippers
- Enhancing public safety

The Company deploys image analysts trained through a proprietary S2 University™ process to analyze scan images and alert law enforcement to specific anomalies. The programs use the Company's proprietary CertScan® system to match scan images to identifying data such as cargo manifests, vehicle license plates and customs declarations, so that shippers pay only legally required duties at customs inspection points.

OSI's Chief Executive Officer, Deepak Chopra, stated, "The February 27 seizure in Albania adds to the solid track record of our integrated services programs in impacting duties evasion and international trafficking of contraband, in Albania and elsewhere. We're proud to support Albanian Customs and State Police in their continuing efforts to combat such illicit activities."

### About OSI Systems

OSI Systems is a vertically integrated designer and manufacturer of specialized electronic systems and components for critical applications in the homeland security, healthcare, defense and aerospace industries. The Company combines more than 40 years of electronics engineering and manufacturing experience with offices and production facilities in more than a dozen countries to implement a strategy of expansion into selective end product markets.
