

Rapiscan Systems Classic

March 16, 2018

Rapiscan Systems Classic: Raising the Bar for Event Security by Seamlessly Integrating Security into the Fan Experience

OSI Systems is proud to partner with the PGA Champions Tour in presenting the Rapiscan Systems Classic, taking place March 23 through 25 at beautiful Fallen Oak in Biloxi, MS. The event will feature many of your favorite golfers on the Champions Tour, as well as security services using Rapiscan technologies and S2 integrated services. At the Rapiscan Systems Classic, you'll be able to see the latest in Rapiscan's cutting-edge inspection and detection systems, as well as S2's integration systems, in action, and even participate in simulations using our systems.

Rapiscan's security technologies and S2 integrated services help organizations evaluate technology needs, develop operational procedures including traffic flows and people and vehicle entry point screening, in depth training for security and support staff, and manage the entire operation during the event. Together, Rapiscan and S2 offer the right technology and techniques to secure events, both big and small. And, as the leader in security integration, our programs proactively improve planning, operations, cost control, training and optimize event revenue streams.
