

OSI Systems' CT Inspection System Selected for Biosecurity Risk Detection in Australia

Jan 7, 2019

HAWTHORNE, Calif.--(BUSINESS WIRE)--Jan. 7, 2019-- OSI Systems, Inc. (the "Company" or "OSI Systems") (NASDAQ: OSIS) today announced that its Rapiscan RTT[®]110 CT inspection system has recently been selected by the Australian government to identify contraband biosecurity materials entering the country inside passenger baggage, mail, and cargo. The Australian government is expected to implement the Company's detection technology as part of its security initiative to improve the efficiency and effectiveness of biosecurity operations both prior to and at the border.

"Since its initial introduction to the market, the RTT 110 has been successful in detecting explosives, weapons, and contraband at airports around the world," said OSI Systems' Chairman and CEO, Deepak Chopra. "This is the first time that the system will be used for biosecurity detection, and we are incredibly excited to demonstrate the versatility and efficiency of this unique solution as part of a comprehensive security infrastructure."

"Biosecurity screening provides critical protection for Australia's \$60 billion agricultural industries and the health of our communities, environment, and the national economy," said The Hon. David Littleproud, Australian Minister for Agriculture and Water Resources. "New technology like the RTT 110 from Rapiscan will be an integral part of preserving our unique ecosystem and creating a more seamless experience at the border."

About OSI Systems

OSI Systems is a vertically integrated designer and manufacturer of specialized electronic systems and components for critical applications in the homeland security, healthcare, defense and aerospace industries. The Company combines more than 40 years of electronics engineering and manufacturing experience with offices and production facilities in more than a dozen countries to implement a strategy of expansion into selective end product markets. Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements relate to OSI Systems' current expectations, beliefs, and projections concerning matters that are not historical facts. Forward-looking statements are not guarantees of future performance and involve uncertainties, risks, assumptions, and contingencies, many of which are outside OSI Systems' control and which may cause actual results to differ materially from those described in or implied by any forward-looking statements. Undue reliance should not be placed on forward-looking statements, which are based on currently available information and speak only as of the date on which they are made. OSI Systems assumes no obligation to update any forward-looking statement made in this press release that becomes untrue because of subsequent events, new information, or otherwise, except to the extent it is required to do so in connection with its ongoing requirements under Federal securities laws. For a further discussion of factors that could cause OSI Systems' future results to differ materially from any forward-looking statements, see the section entitled "Risk Factors" in OSI Systems' most recently filed Annual Report on Form 10-K and other risks described therein and in documents subsequently filed by OSI Systems from time to time with the Securities and Exchange Commission.
