OSI Systems Announces Introduction of Spacelabs Healthcare Ultraview DM3 Dual-Mode Vital Signs Monitor

HAWTHORNE, Calif., Apr 19, 2010 (BUSINESS WIRE) -- OSI Systems, Inc. (NASDAQ:OSIS), a vertically-integrated provider of specialized electronic products for critical applications announced that its Healthcare Division, Spacelabs Healthcare, has introduced the Ultraview DM3 dual-mode vital signs monitor. The dual-mode monitor is the latest in the Spacelabs Ultraview series of patient monitors and can be used in clinical care environments for basic vital signs monitoring including SpO2, pulse rate, non-invasive blood pressure, respiration and temperature.

The Ultraview DM3 can operate either in Spot Check or Monitoring Mode. In Spot-Check mode, the monitor supports batch collection of basic vitals for multiple patients and also has the ability to collect supplemental patient information, such as Pain Level, Patient Position and Caregiver ID for inclusion on the patient's record once connected to the hospital's IT network. In Monitoring mode, the Ultraview DM3 provides continuous monitoring and alarm support for patients who require more vigilance, such as within the critical care environment.

OSI Systems Chairman and CEO, Deepak Chopra, stated, "We are pleased to announce the introduction of the Spacelabs Ultraview DM3. The launch underscores Spacelabs' tradition of connecting innovation with care. The Ultraview DM3 is an exciting addition to our expanding line of monitoring and diagnostics products providing clinicians and care providers with a versatile and cost-effective clinical solution."

The Ultraview DM3 has just recently received FDA 510(k) clearance for market and sale within the United States.

About OSI Systems, Inc.

OSI Systems, Inc. is a vertically integrated designer and manufacturer of specialized electronic systems and components for critical applications in the homeland security, healthcare, defense and aerospace industries. We combine more than 30 years of electronics engineering and manufacturing experience with offices and production facilities in more than a dozen countries to implement a strategy of expansion into selective end product markets.
