## OSI Systems Announces Introduction of Spacelabs Ultraview 2900 Patient Monitor

HAWTHORNE, Calif., Apr 23, 2010 (BUSINESS WIRE) -- OSI Systems, Inc. (NASDAQ:OSIS), a vertically-integrated provider of specialized electronic products for critical applications, announced that its Healthcare Division, Spacelabs Healthcare, has expanded its patient monitoring portfolio with the introduction of the Spacelabs Ultraview 2900. The new dual display capability assists clinicians to efficiently chart and access lab results on one display, while the other display remains dedicated to their patients' real-time physiologic waveforms and alarms.

DNATM (Dynamic Network Access™), which functions like a Citrix thin-client, is embedded in the Spacelabs Ultraview 2900 monitor and enables full access to all applications installed on a hospital's Citrix server. Consistent with Spacelabs' commitment to open architecture, DNA operates on a non-proprietary infrastructure and no additional hardware is required.

OSI Systems Chairman and CEO, Deepak Chopra, said, "We continue to expand our portfolio of patient monitoring products. With the introduction of the Spacelabs Ultraview 2900 we look to improve the efficiency and accuracy of patient care within the critical care environment."

### About OSI Systems, Inc.

OSI Systems, Inc. is a vertically integrated designer and manufacturer of specialized electronic systems and components for critical applications. The Company sells its products in diversified markets, including homeland security, healthcare, defense and aerospace. The Company has more than 30 years of experience in electronics engineering and manufacturing and maintains offices and production facilities located in more than a dozen countries. It implements a strategy of expansion by leveraging its electronics and contract manufacturing capabilities into selective end product markets through organic growth and acquisitions.
